CORTECO®

Das Unternehmen | L'entreprise | Società

THE COMPANY

EN

CORTECO as a member of the global Freudenberg Group is specialised in products for the Independent Aftermarket. The CORTECO range comprises automotive spare parts in the areas of sealing and vibration control technology as well as service parts. The Freudenberg Group is a leading Original Equipment Manufacturer and employs around 37,000 people in 57 countries. Independent garages trusting in CORTECO spare parts therefore profit from original quality made by Freudenberg..

More than 19,000 references support CORTECO's position as one of the leading companies in the Independent Aftermarket. The company sells spare parts and service kits worldwide from five European and a further four non-European locations.

DE

CORTECO ist der Spezialist der global aufgestellten Unternehmensgruppe Freudenberg für den freien Automobilersatzteilmarkt. Das CORTECO Sortiment umfasst Automobilersatzteile für die Dichtungs- und Schwingungstechnik sowie Serviceteile. Die Freudenberg Gruppe ist ein führender Erstausrüster der Automobilhersteller und beschäftigt rund 37.000 Mitarbeiter in 57 Ländern. Freie Werkstätten profitieren bei CORTECO somit von Ersatzteilen in Original-Qualität aus dem Hause Freudenberg.

Über 19.000 Referenzen unterstreichen die Position von CORTECO als eines der führenden Unternehmen im freien Ersatzteilhandel. Mit fünf Standorten in Europa und vier weiteren außereuropäischen Standorten vertreibt das Unternehmen weltweit Ersatzteile und Service Kits.

FR

CORTECO est le spécialiste au sein du groupe Freudenberg de la distribution de pièces de rechange automobile (aftermarket). Le groupe Freudenberg est un des leaders mondial en équipement d'origine et emploie 37.000 personnes dans 57 pays. Les gammes CORTECO s'appliquent notamment dans les domaines de l'étanchéité, des pièces antivibratoires et de la filtration d'habitacle. Ainsi, les clients utilisant des pièces CORTECO bénéficient d'une qualité «made by Freudenberg».

Acteur majeur de la rechange indépendante avec plus de 19.000 références, CORTECO s'appuie sur une logistique renforcée comprenant cinq sites européens et quatre hors Europe.

IT

La CORTECO, società del gruppo Freudenberg, è specializzata nella distribuzione di prodotti tecnici per l'Aftermarket Indipendente. La gamma CORTECO comprende parti di ricambio per le linee di prodotto specializzate nel settore degli elementi di tenuta, smorzamento delle vibrazioni e parti di servizio per tutte le principali applicazioni del mercato «Automotive». Il Gruppo Freudenberg, di cui fa parte, è uno dei principali fornitori di componentistica di primo equipaggiamento e occupa circa 37.000 dipendenti in 57 paesi. E' proprio per questo che le officine indipendenti si fidano dei prodotti CORTECO, perché sono prodotti di qualità originale Freudenberg.

Più di 19.000 articoli disponibili a gamma permettono a CORTECO di posizionarsi tra i principali fornitori leader nel mercato dell'Aftermarket indipendente. Il gruppo CORTECO distribuisce da cinque siti Europei e da ben quattro siti extra Europei le sue parti di ricambio singole ed i suoi kit di manutenzione in tutte le parti del mondo.

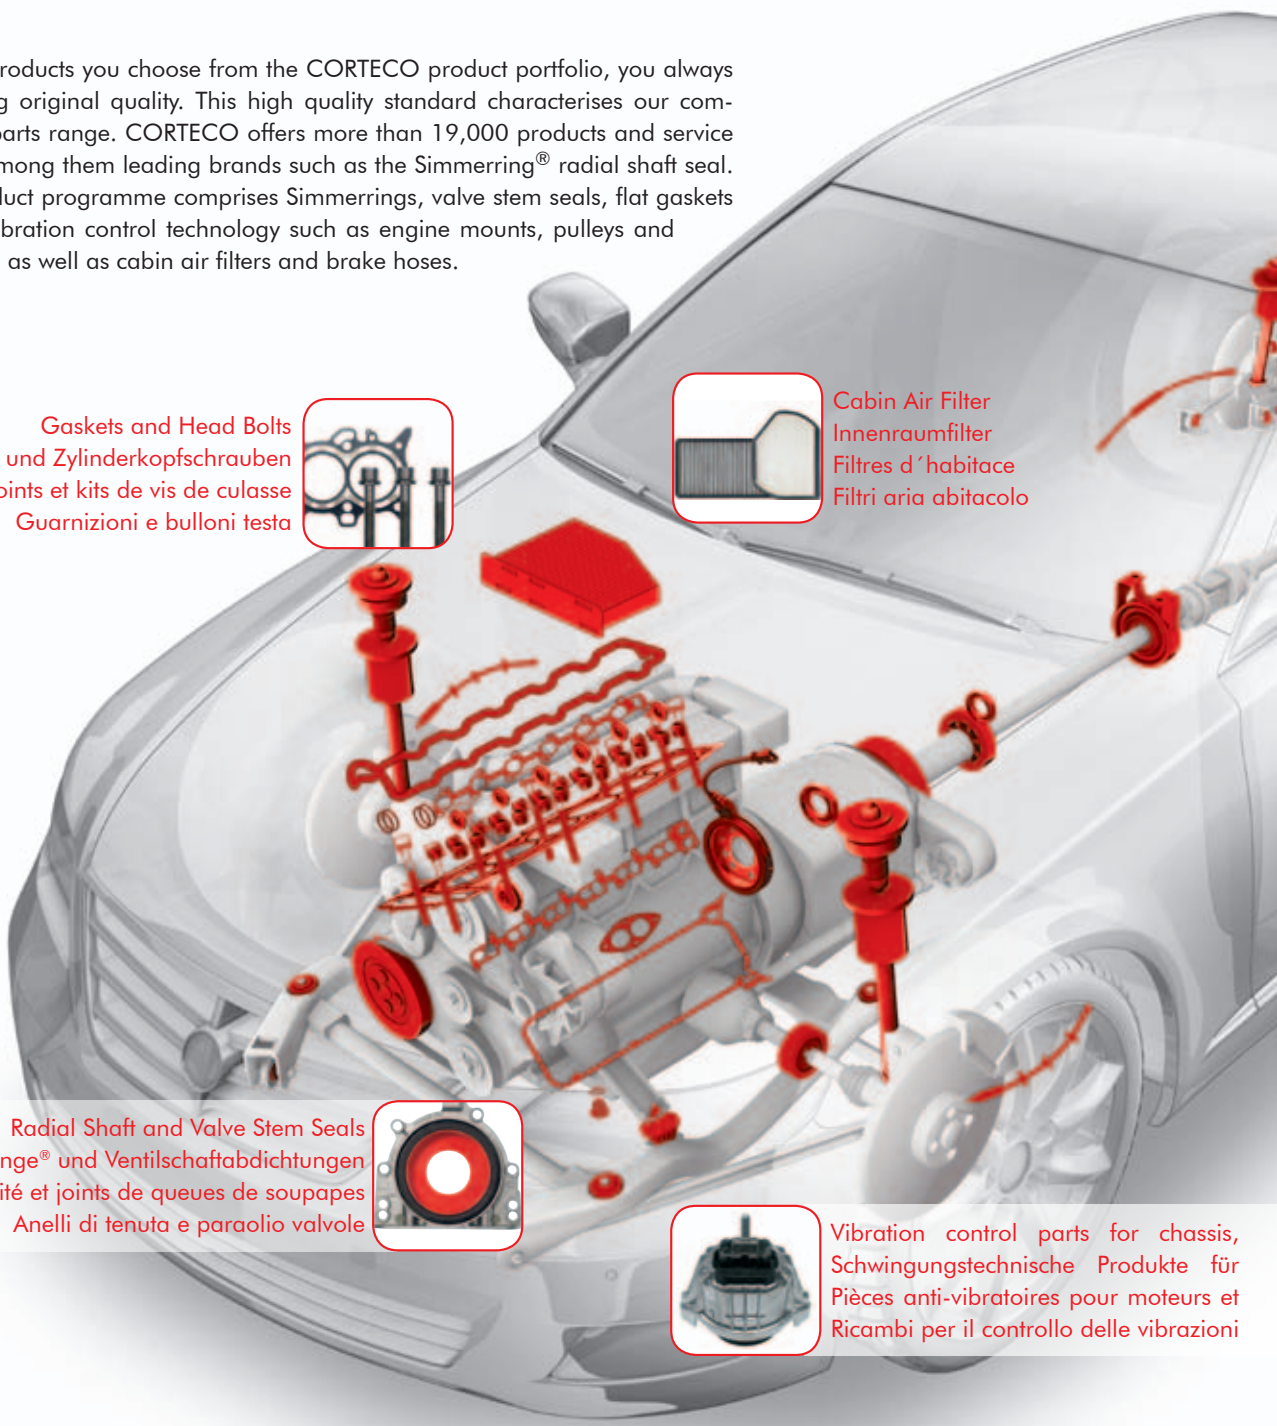
PRODUCT OVERVIEW

EN

No matter which products you choose from the CORTECO product portfolio, you always receive outstanding original quality. This high quality standard characterises our comprehensive spare parts range. CORTECO offers more than 19,000 products and service kits to garages - among them leading brands such as the Simmerring® radial shaft seal. Our extensive product programme comprises Simmerrings, valve stem seals, flat gaskets and engine kits, vibration control technology such as engine mounts, pulleys and suspension mounts as well as cabin air filters and brake hoses.

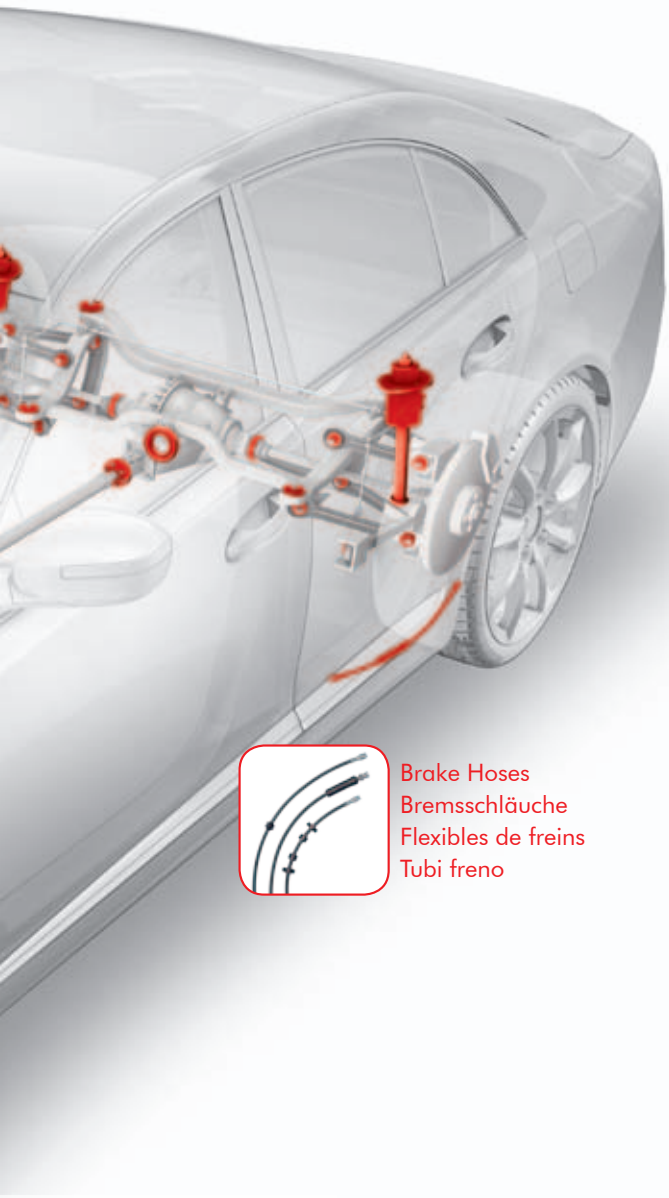


Gaskets and Head Bolts
Dichtungen und Zylinderkopfschrauben
Joints et kits de vis de culasse
Guarnizioni e bulloni testa

Cabin Air Filter
Innenraumfilter
Filtres d´habitace
Filtri aria abitacolo

Radial Shaft and Valve Stem Seals
Simmerringe® und Ventilschaftabdichtungen
Bagues d´étanchéité et joints de queues de soupapes
Anelli di tenuta e paraolio valvole

Vibration control parts for chassis,
Schwingungstechnische Produkte für
Pièces anti-vibratoires pour moteurs et
Ricambi per il controllo delle vibrazioni



Brake Hoses
Bremsschläuche
Flexibles de freins
Tubi freno

engine and transmission
Fahrwerk, Motor und Getriebe
transmissions
per telaio, motore e trasmissione

DE

Für welches Produkt Sie sich aus der CORTECO-Produktfamilie auch entscheiden, Sie erhalten immer herausragende Original-Qualität. Dieser hohe Qualitätsstandard kennzeichnet unser umfangreiches Ersatzteil-Sortiment. CORTECO bietet Werkstätten mehr als 19.000 Produkte und Service Kits – unter ihnen führende Marken wie z. B. den Simmerring® Radialwellendichtring. Unser breites Produktsortiment umfasst Simmerringe, Ventilschaftabdichtungen, Flachdichtungen und Motorsätze, Motor- und Fahrwerkslager, Riemenscheiben sowie Innenraumfilter und Bremsschläuche.

FR

Quelque soit le produit CORTECO que vous choisissez, vous achetez toujours la qualité d'origine. CORTECO offre plus de 19.000 références de qualité, parmi lesquelles des marques leaders comme les bagues d'étanchéité Simmerring®. Nos gammes comprennent des bagues d'étanchéité dynamique, des joints de queue de soupapes, des joints et kits de joints, des pièces antivibratoires pour moteur, transmission ou châssis, des filtres d'habitacle ou encore des flexibles de freins.

IT

Qualunque prodotto scegliate dalla gamma CORTECO, troverete sempre la necessaria qualità originale. La nostra gamma è caratterizzata da prodotti di alta qualità. CORTECO offre alle officine più di 19.000 parti di ricambio e kit riparazione, tra i quali importanti marchi depositati come Simmerring® e CORTECO per gli anelli di tenuta. Il nostro programma di vendita include anelli di tenuta, paraolio stelo valvola, guarnizioni piane e kit guarnizioni motore, supporti motore, pulegge, supporti sospensioni ed anche ricambi di servizio come filtri aria abitacolo e tubi freno.

It's what's inside that matters

VIBRATION CONTROL

Engine mounts ensure a load-bearing and elastic connection between engine and chassis. If an inferior engine mount is installed, it can result not only in a failing mount, but also in leakages, damage to neighbouring auxiliary units or possibly major engine damage. When dealing with vibration control parts make sure to buy original quality parts designed and manufactured by TrelleborgVibracoustic

Multi-function mount

The combination of a hydraulic absorbing bearing and torque support has proven to be a cost effective design.

Hydro mount with stop and damper

As increasingly powerful engines, generating high forces, are developed, the use of spring travel and interior stops are required. Additionally, acoustics are controlled by the use of frequency tuned materials.

All-terrain vehicle suspension

Off Road vehicles require additionally designed-in features; to compensate for the increased forces generated by low gear ratio's and engine movement etc. whilst off-road; such as high capacity spring bumpers able to operate in all directions.

Hydro mount

Hydro mounts provide optimum ride comfort. They combine the acoustic isolation function of a conventional rubber mount with balanced damping performance.

Switchable engine mounts for Diesel engines

Designed to reduce the idle "stutter" common in diesel engines, by compensating throughout the total speed band.

Electrically switchable hydro mount

If a vacuum cannot be used to switch hydro mounts, electrically operated hydro mounts can be implemented. The switching function reduces the idle speed stutter and improves the acoustics on a broadband level.

Bush as mounting element

Classic rubber mounts whose spring rates in all directions are adjusted so that they provide the best possible isolation and force control.

Swivel support

Torque rods consist of two bushes and a reaction link. The two bushes act as joints and allow power transmission only in the direction of the reaction link. These are mainly installed in front wheel drive vehicles where high torque forces require supporting horizontally.

Die inneren Werte zählen

SCHWINGUNGSTECHNIK

Motorlager sorgen für eine tragende und elastische Verbindung zwischen Motor und Karosserie. Wird ein minderwertiges Motorlager verbaut, können neben dem Lagerausfall, Leckagen, schwere Motorschäden oder Beschädigung an den angrenzenden Bauteilen die Folge sein. Achten Sie beim Kauf von schwingungstechnischen Produkten auf Original-Qualität von TrelleborgVibracoustic

Mehrfunktionslager

Kostengünstige Konstruktion aus Kombination eines hydraulisch dämpfenden Lagers mit einer Drehmomentabstützung.

Hydrolager mit Anschlag und Tilger

Leistungsstarke Motoren erzeugen hohe Kräfte, die beim Längseinbau vorwiegend in axialer Richtung wirken. Neben langen Federwegen ist hierbei der Einsatz von innenliegenden Anschlägen erforderlich. Für die Verbesserung der Akustik sorgt eine gezielte Absenkung der dynamischen Steifigkeit in den relevanten Frequenzbereichen.

Geländewagenlager

Geländegängige Fahrzeuge erfordern besonders robuste Lagerkonstruktionen mit großvolumigen Anschlagpuffern in allen Raumrichtungen, die sowohl die hohen Reaktionskräfte als auch die großen Motorbewegungen bei Geländebetrieb tolerieren.

Hydrolager

Hydraulische Motorlager sorgen für optimalen Fahrkomfort. Sie verbinden die akustische Isolierungsfunktion eines herkömmlichen Gummilagers mit ausgewogenen Dämpfungseigenschaften.

Schaltbares Lager für Dieselmotoren

Einerseits können Leerlaufvibrationen durch Schwingungstilgung erheblich reduziert werden. Andererseits kann der Betriebszustand eines klassischen Hydrolagers mit Stuckerdämpfung und Geräuschisolation beim Fahren eingestellt werden. Derartige Lager werden häufig als Motorlager bei Fahrzeugen mit Dieselmotor eingesetzt.

Elektrisch schaltbares Hydrolager

Wenn für die Schaltung von Hydrolagern kein Unterdruck eingesetzt werden kann, kommen elektrisch schaltbare Hydrolager zum Einsatz. Die Schaltfunktion ermöglicht eine Reduktion des Leerlaufschüttelns bei breitbandiger Verbesserung der Akustik.

Buchse als Lagerelement

Klassisches Gummilager, dessen Federraten in den Raumrichtungen so abgestimmt werden, dass eine bestmögliche Isolation und gute Kraftabstimmung erfolgt.

Pendelstütze

Pendelstützen bestehen aus zwei Buchsen und einer Strebe. Die beiden Buchsen wirken wie Gelenke und lassen eine Kraftübertragung nur in Strebenrichtung zu. Sie werden vor allem in Fahrzeugen mit Frontantrieb eingesetzt, bei denen große Kräfte aus Drehmomenten horizontal abgestützt werden.

Ce qui compte est à l'intérieur

CONTROLE DES VIBRATIONS

Les supports moteurs garantissent une liaison portante et élastique entre le moteur et la carrosserie. Le montage d'un support moteur de qualité inférieure peut entraîner des fuites, des endommagements graves du moteur ou la détérioration de composants périphériques, en plus de la défaillance du support lui-même. Lors de l'achat de produits antivibratoires, veillez à ce que ceux-ci soient de la qualité d'origine, conçus et fabriqués par TrelleborgVibracoustic

Supports multifonctions

Une construction à un prix avantageux est la combinaison d'un support à amortissement hydraulique et d'un amortisseur de couple.

Support hydraulique avec butée et amortisseur

Les moteurs puissants génèrent de grandes forces qui, en cas de montage longitudinal, agissent principalement dans le sens axial. L'utilisation de butées internes est nécessaire en même temps que de longs débattements. Une réduction bien ciblée de la rigidité dans les domaines de fréquences appropriés assure l'amélioration de l'acoustique.

Suspension pour véhicule tout-terrain

Les véhicules « tout-terrain » requièrent des structures de support robustes, dotées de butées élastiques d'un grand volume dans toutes les directions, absorbant à la fois les forces de réaction élevées et les grands mouvements du moteur pendant l'utilisation en tout-terrain.

Support hydraulique

Les supports moteurs hydrauliques veillent au confort optimal de la conduite. Ils associent la fonction d'isolation acoustique d'un support en caoutchouc traditionnel et l'équilibre des propriétés d'amortissement des vibrations.

Support commutable pour les moteurs diesel

Réduit le ballotement caractéristique très marqué sur les moteurs diesel au régime de ralenti. Avec une plus faible constante de rappel, les propriétés d'absorption sont adaptées spécifiquement au régime de ralenti et au régime plus élevé correspondant au couple maximal.

Support commutable électriquement

Les supports commutables électriquement sont utilisés quand aucune dépressurisation ne peut être utilisée pour la commutation des supports hydrauliques. La fonction de commutation permet une réduction des secousses pendant le régime de ralenti tout en améliorant largement l'acoustique.

Des bagues comme élément de support

Support classique en caoutchouc, dont la constante de rappel dans les directions est adaptée de manière à obtenir la meilleure isolation possible et un bon contrôle des forces.

Biellette de couple

Les biellettes de suspension sont composées de deux bagues et d'un tirant. Les deux bagues agissent comme des articulations et ne permettent une transmission des forces qu'en direction du tirant. Elles sont installées principalement dans les véhicules à traction avant, sur lesquels les grandes forces de couples sont supportées horizontalement.

Ciò che conta è all'interno

CONTROLLO DELLE VIBRAZIONI

I supporti motore garantiscono una connessione portante ed elastica tra il motore e la carrozzeria. Qualora venga installato un supporto motore di qualità non adeguata le possibili conseguenze possono essere perdite, gravi danni al motore o alle unità ausiliari limitrofe, oltre ovviamente alla rottura del supporto stesso. Quando si acquistano prodotti per il controllo delle vibrazioni, bisogna accertarsi di acquistare ricambi di qualità originale come quelli progettati e prodotti da TrelleborgVibracoustic

Supporto multi-funzione

Un design intelligente nato dalla combinazione di un cuscinetto ammortizzante idraulico e di un supporto torsionale.

Supporto idraulico con arresto ed ammortizzatore

I moderni motori ad alte prestazioni necessitano di speciali supporti per compensare le elevate forze che generano durante il loro funzionamento. Per questo, si rendono necessarie alte capacità elastiche e tamponi di fine corsa interni. L'assorbimento acustico viene invece attuato tramite l'uso di materiali specificatamente tarati.

Sospensioni per veicoli fuoristrada

I veicoli fuoristrada richiedono un design delle sospensioni adatto a sforzi estremi, con respingenti molleggiati in tutte le direzioni. Questa soluzione assorbe le elevate forze di reazione causate dai rapporti corti e dai movimenti del motore dovuti alla guida su strade sterrate.

Supporto idraulico

I supporti idraulici offrono un comfort di guida ottimale. Abbinano la funzione di isolamento acustico di un supporto in gomma tradizionale ad una performance di ammortizzazione equilibrata, fornita dalla parte idraulica.

Supporti del motore commutabili per motori diesel

Il loro scopo è quello di ridurre le vibrazioni al minimo tipiche dei motori diesel.
La loro rigidità variabile compensa le vibrazioni motore lungo tutto il suo campo di utilizzo.

Supporto idraulico commutabile elettricamente

Se non è possibile utilizzare il vuoto per la regolazione dei supporti idraulici, è possibile implementare dei supporti idraulici azionati elettricamente. La funzione di commutazione riduce le vibrazioni al minimo e migliora l'acustica durante tutto l'arco di utilizzo del motore.

La boccola quale elemento di supporto

Si tratta del classico supporto in gomma, le cui rigidità in tutte le direzioni sono regolate in modo che possano offrire il meglio in fatto di isolamento e controllo della forza.

Supporto oscillante

I supporti oscillanti sono composti da due boccole e da un giunto di reazione. Le due boccole fungono da giunti e consentono la trasmissione della potenza solo nella direzione del giunto di reazione. Sono installati soprattutto nei veicoli a trazione anteriore in cui elevate forze torcenti devono essere supportate orizzontalmente.

DISCLAIMER

EN

Every care has been taken to assure the information in this catalogue is correct, but we cannot accept any responsibility for errors. All particulars subject to alteration. This catalogue contains products in original quality. We reserve the right to make technical changes. Original numbers from automobile manufacturers only serve as a cross-reference comparison with the CORTECO-No. and should not be used in delivery notes and invoices to vehicle owners. Full or partial reproduction permitted only with our written approval.

DE

Die Angaben in diesem Katalog wurden mit größter Sorgfalt auf ihre Richtigkeit überprüft. Trotzdem können Ersatzansprüche auf Grund von Angaben aus diesem Katalog nicht anerkannt werden. Alle Angaben erfolgen ohne Gewähr. Dieser Katalog enthält Produkte in Original-Qualität. Konstruktionsänderungen bleiben vorbehalten. Soweit wir in unseren Unterlagen Bezug auf die Ersatzteilnummer des Fahrzeugherstellers nehmen, dient diese nur zu Vergleichszwecken. Eine Verwendung derartiger Angaben in Rechnungen an den Fahrzeugbesitzer ist nicht statthaft. Der Nachdruck, auch auszugsweise, ist nur mit unserer schriftlichen Genehmigung gestattet.

FR

L'exactitude des données de ce catalogue a été vérifiée avec le plus grand soin. Néanmoins, tout droit à indemnité lié aux indications du présent catalogue est exclu. Ce catalogue comporte des produits de qualité d'équipement d'origine. Nous nous réservons le droit de procéder à des modifications techniques sans préavis. Si nous nous référons dans nos documents au numéro de pièce de rechange du fabricant automobile, nous le faisons uniquement à des fins de comparaison. Il est interdit de faire usage de telles données dans des factures adressées au propriétaire du véhicule. Toute réimpression, même sous forme d'extraits, requiert notre autorisation.

IT

Ci siamo adoperati affinché i dati contenuti in questo catalogo siano i più esatti possibili. Tuttavia decliniamo ogni responsabilità per eventuali inesattezze, non verranno da noi riconosciuti diritti di risarcimento di qualsiasi sorta causati da errori od omissioni. Questo catalogo contiene prodotti di qualità «primo equipaggiamento». Ci riserviamo il diritto di apportare modifiche tecniche. I numeri originali e i nomi dei costruttori citati in questo catalogo servono esclusivamente a scopo comparativo e non possono essere utilizzati sulle bolle di accompagnamento e fatture ai proprietari di autoveicoli. La riproduzione, anche sommaria, è concessa solo dietro nostra autorizzazione.
